Excludes data for mining operations in manufacturing establishments.

Represents production of crude material. For talc, soapstone, and pyrophyllite, includes production in other industries amounting to less than 5 percent of the total shown.

Represents 1,000 long tons of 2,240 pounds.

Includes shipments by other industries, amounting to less than 10 percent of the total shown.

Represents production. For pumice and pumicite and peat, includes production in other industries amounting to less than 5 percent of the total shown.

Some detail was reported for service establishments. The figures shown for "Open-pit" represent those reported for stripping overburden and for mining minerals for the account of others. The figures shown for "Surface" represent exploration work, including geophysical and other exploratory surveying, and such other services as drilling.

Represents exploration work, including geophysical and other exploratory surveying and stripping overburden.

Minerals received for preparation are included with purchases for resale.
